

How to Run the Project Easily

BIS Store — Django prototype (no database, no Node.js needed)

1. Check Python version (3.10 or newer)

```
python --version
```

2. Go to the project folder

```
cd "bis-store"
```

3. Create a virtual environment

```
python -m venv .venv
```

4. Activate it (Windows PowerShell)

```
.venv\Scripts\Activate.ps1
```

5. Install dependencies

```
pip install -r requirements.txt
```

6. Run the server

```
python manage.py runserver
```

7. Open in your browser

```
http://127.0.0.1:8000/
```

Optional: run the test suite

```
python manage.py test
```

Note: you do not need to run **migrate** — this prototype has no database on purpose.
